

A50

The Sharkoon A50 is a single-tower CPU air cooler equipped with 5 heat pipes that ensure an efficient heat transfer from the CPU to the heat sink. Even with demanding applications, this CPU cooler is designed to continuously maintain an optimum temperature thanks to its precisely controllable 120 mm fan, compatibility with the latest CPU sockets, and a good TDP of 230 W.

Features

PRECISE 120 mm FAN

The A50 is a single-tower solution with a precisely controllable 120 mm PWM fan with 500 to 1,800 rpm. The fan speed can be adjusted according to the system load, allowing a flexible noise level of up to 30 dB(A).

5 COPPER HEAT PIPES

To ensure a continuously good heat dissipation, the A50 has 5 copper heat pipes, each with a diameter of 6 mm as well as a direct-touch connection.

GOOD TDP OF 230 W

With a good TDP of 230 W, the A50 offers sufficient performance to dissipate heat quickly and effectively and to optimally cool even modern processors.

FULL SOCKET COMPATIBILITY

The A50 is compatible with all common CPU sockets, including the new LGA1851, making it easy to use in any PC system.

COMMON SIZE

At 120 x 72 x 153 mm and 605 g, the A50 has usual single-tower dimensions, allowing a high level of compatibility for all kinds of hardware builds.

FLEXIBLE AND EASY INSTALLATION

The A50 CPU cooler is specially designed for the quick and easy installation in new or existing systems.
