

Product Overview

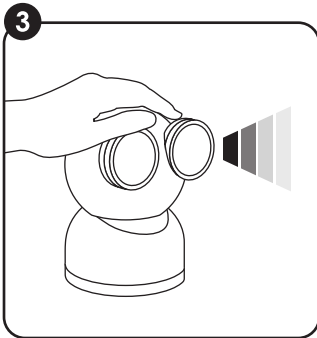

How To Use

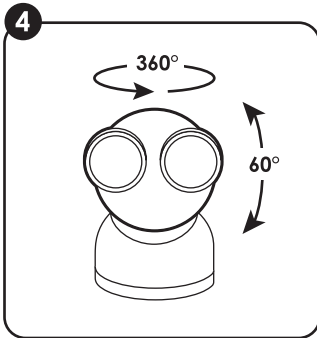

Quick set up
Plug in the adapter on the underside of his head. Place its head back onto his body and Mr.Watt is ready to bright up any area.

Tap the head to switch on/off
The sensor inside Mr. Watt recognizes your touch. By tapping the wooden head you will switch on or switch off the light.

Dim the light
Try resting your hand on his head and it will either dim or brighten the light. Mr.Watt also has a very good memory. When you turn him off and back on, he will remember your previous light setting.

Rotationable for your perfect position
You can rotate the head of the lamp in your preferred position. Mr. Watt is able to rotate his head 360 degree horizontally and 60 degree vertically.
